Melody,

can you see what historical coverage is available for the Circle Court Site, with the specific area of interest outlined in the green box in the attached site map. A drum with a trichloroethylene label was recently found in an overgrown area along an east-west fence line within the green box and may be related to previous landowners. A verbal description provided by a property owner indicated the past presence of a barn and trailer within the northern portion of the green box (there is now a new house that was constructed in 2011). Thanks.

Also, can you overlay a grid on 50 ft. spacing within the red box in the attached file. Thanks.
